1. [REDACTED] visited me yesterday morning and gave me an informal rundown on the subject project, classified name of which is reported to be [REDACTED], with which he is to be associated following his formal separation from the [REDACTED] on 1 March.

2. One thing he said gave me pause, and that was that he expected to receive his winds aloft data from the Project Operations Center here, by virtue of our TWX tie-in with [REDACTED]

[REDACTED] I am not aware that this has received [REDACTED] approval or yours.

3. If this report is true, I should like to point out that if [REDACTED] himself is to receive this data, I assume this means a requirement for him to maintain his AQUATONE clearance, as well as his building badge or a revised version thereof. We should know what the plot is on this matter before he starts to clear the Project and the Agency in order that we may govern our debriefing accordingly.
